annotated-region development metrics:
false_positive_px: 1
false_negative_px: 380
precision: 0.9995
sensitivity: 0.8524
f1: 0.9201
training_log_loss_total: 19.0956

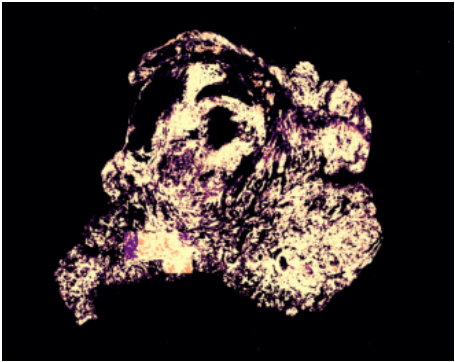

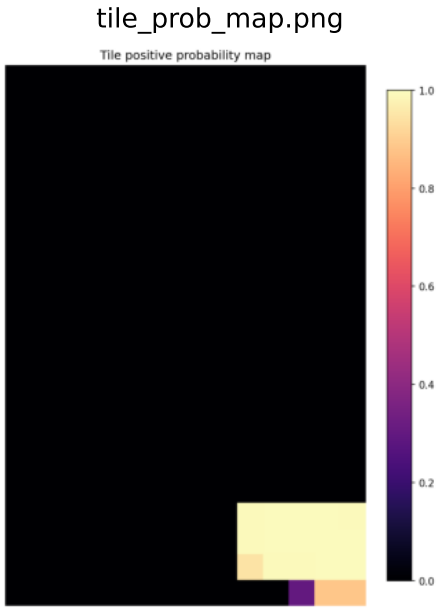

annotated_total_px: 5130
annotated_positive_px: 2574
annotated_negative_px: 2556

- space interpretation:
- Metrics are computed on annotated training regions only (scribble labels).
 - Ignore/Unlabeled pixels are excluded from evaluation.
 - Outputs (maps/masks/overlay) are in selected working image space.
 - metrics output note: All masks/maps/overlay are exported in working image space (selected)

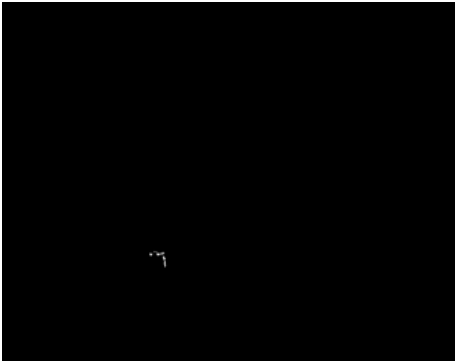

key caveats / limitations:
- none recorded by upstream metrics
